PROFESSIONAL SUMMARY

Full Stack Developer with 4+ years of hands-on experience building and scaling secure, high-performance web applications in PHP and Laravel. Led a team of 5–6 engineers end to end — from client requirement analysis and technical design through code review, deployment and production support — across ERP, HRMS, logistics, warehouse and fintech products. Strong in REST API design, third-party and payment gateway integrations (Razorpay, HDFC SmartGateway), MySQL/MsSQL/PostgreSQL query optimisation, and cloud deployment with Git-based workflows and Jira. Comfortable across the stack, having delivered production modules in Angular, Node.js and Python/Django alongside core Laravel work. Known for picking up unfamiliar technologies fast and mentoring others into them.

TECHNICAL SKILLS

Languages: PHP, JavaScript, Python, TypeScript (basic), SQL

Frameworks: Laravel, Flask, Django

Front End: Angular, jQuery, JavaScript (ES6+), Bootstrap, HTML5, CSS3

Databases: MySQL, MsSQL, PostgreSQL — schema design, indexing, query optimisation, stored procedures

APIs & Integrations: REST API design & development, JSON/XML, OAuth 2.0, Payment Gateways (Razorpay, HDFC SmartGateway), Magento Open Source API, OpenAI Chat API, HeyGen AI Video API, Angel One Smart API

Cloud & DevOps: Microsoft Azure (App Service deployment), Apache/Nginx, cron job scheduling, environment configuration

Tools & Practices: Git, GitHub, Jira, Postman, code reviews, coding standards, source control branching strategy, performance profiling & optimisation

PROFESSIONAL EXPERIENCE

Team Lead — Full Stack Developer

Step In Technologies, Shivamogga, Karnataka

- Owned end-to-end delivery of 9+ production web applications built primarily on Laravel and MySQL, spanning education ERP, HRMS, logistics, inventory/warehouse, e-learning and trading domains.
- Led and mentored a team of 5–6 developers: allocated sprint work, ran code reviews, enforced coding standards and Laravel best practices, and conducted 1:1 guidance that helped juniors take independent module ownership.
- Acted as the primary technical point of contact for clients — gathered and analysed requirements, translated business processes into technical specifications and effort estimates, demoed builds, and managed change requests and UAT feedback through to sign-off.
- Designed and developed secure REST APIs consumed by web and mobile clients, implementing token-based authentication, role-based access control, request validation and standardised error handling.
- Integrated multiple payment gateways (Razorpay, HDFC SmartGateway) with signature verification and webhook-driven reconciliation, supporting online fee and transaction collection with zero payment-mismatch incidents.
- Improved application performance by profiling slow endpoints and resolving N+1 query issues with eager loading, adding database indexes, restructuring heavy reporting queries and introducing caching.
- Deployed and maintained applications on Azure and Linux-based hosting: configured environments, managed releases, set up cron-driven background jobs and queue workers for payroll runs, attendance sync, result generation and scheduled notifications.
- Managed issue tracking and release workflows in Jira; maintained Git branching, pull-request review and merge discipline across the team.
- Debugged and resolved production issues across PHP, MySQL and server layers, coordinating with clients on severity and turnaround while keeping uptime uninterrupted.

KEY PROJECTS

Education ERP Platform — *Laravel, MySQL, JavaScript, jQuery*

- Complete college administration suite covering admissions, finance, examination, attendance and section allocation for students and staff.
- Built automated result generation with a configurable auto-grading policy, plus staff leave and attendance workflows — replacing manual spreadsheet processes.
- Integrated online fee payment via Razorpay/HDFC SmartGateway with receipt generation and daily collection reconciliation reports.

HRMS — Human Resource Management System — *Laravel, MySQL, JavaScript*

- Modules for employee attendance, leave management, monthly payroll generation and resignation/exit workflows.
- Integrated biometric device data to auto-generate attendance, with scheduled cron jobs computing monthly payroll, deductions and payslips without manual intervention.

Automated Trading Application — *PHP, MySQL, JavaScript*

- Automated stock buy/sell execution based on pre-defined strategies, with OAuth-based session authentication and management via broker Smart API.
- Consumed live market data feeds and implemented strategy logic with safeguards, order logging and audit trails.

Inventory Management System — *Laravel, MySQL, JavaScript*

- Seed inventory tracking across Products, Order Forms and Lots modules.
- Integrated Magento Open Source API to sync product catalogue data between systems.

AI Chatbot & Career Management Platform — *Python, Flask, Laravel, MySQL*

- Career advisory and professional learning platform delivering guidance to employees through AI-generated video.
- Integrated OpenAI Chat API for contextual question answering and HeyGen AI Video API for automated video generation.

Coaching Academy / E-Learning Portal — *Laravel, Bootstrap, MySQL*

- Course purchase and delivery platform with quizzes, MCQ and special tests, answer keys, study materials, daily current affairs and video tutorials.

EDUCATION

Bachelor of Computer Applications (BCA) — **89%**

Government First Grade College, Shivamogga | 2021
